

Residential | Information Sheet | PI 320i

Incentives are available for detached single-family or manufactured homes in Oregon serviced by participating Energy Trust utilities (Portland General Electric (PGE), Pacific Power, NW Natural, Cascade Natural Gas, or Avista) unless noted otherwise. All work must comply with the Residential Specifications Manual and all other Energy Trust requirements. For small multifamily properties, please reference the Multifamily Incentive Information Sheet		
Energy Improvement (Heating and Cooling)	Incentive Amount	Requirements
Ductless Heat Pump Installed in a Rental Property ¹	\$1,800	Must have an HSPF2 of 8.10 or greater as rated by the Air Conditioning, Heating & Refrigeration Institution (AHRInet.org). Must replace electric resistance heat. Highest capacity indoor unit must be installed in the main living space (e.g., living room, great room). Mini-split systems with limited ducting may be eligible, email residentialta@energytrust.org for review and approval. One incentive per residence. Only available to residences serviced by PGE and Pacific Power.
Ductless Heat Pump (Savings Within Reach) ¹		
Ductless Heat Pump	\$800	
Ducted Heat Pump	\$1,000	Must have an HSPF2 7.50 or greater as rated by the Air Conditioning, Heating & Refrigeration Institution (AHRInet.org) and replace electric forced air furnace as the residence's primary heating system. Heat pump cannot have a backup gas heating system. Thermostat lockout must be set to 35°F or lower if electric furnace auxiliary heat present. Cannot be combined with other heat pump, heat pump controls or smart thermostat incentives. Only available to residences serviced by PGE and Pacific Power.
Ducted Heat Pump Installed in a Rental Property ¹	\$3,000	
Ducted Heat Pump (Savings Within Reach) ¹	\$3,000	
Extended Capacity Heat Pump	\$1,000	Unit must be a central ducted system and included in Energy Trust's list of qualifying products . Controls must be set with an auxiliary heat lockout setting when available. Heat pump cannot have a backup gas heating system. Cannot be combined with other Energy Trust heat pump, heat pump controls or smart thermostat incentives. Only available to residences serviced by PGE and Pacific Power. Indoor Configuration: Eligible systems configurations must include a central ducted system with traditional air handler (slim duct types do not qualify) serving the primary living space of the home.
Extended Capacity Heat Pump (Savings Within Reach) ¹	\$2,000	
Extended Capacity Heat Pump Installed in a Rental Property ¹		
Extended Capacity Heat Pump	\$3,000	Must replace electric forced air furnace as residence's primary heating system. <p>Incentives are available for detached single-family or manufactured homes in Oregon serviced by participating Energy Trust utilities (Portland General Electric (PGE), Pacific Power, NW Natural, Cascade Natural Gas, or Avista) unless noted otherwise. All work must comply with the Residential Specifications Manual and all other Energy Trust requirements. For small multifamily properties, please reference the Multifamily Incentive Information Sheet</p>		
Energy Improvement (Heating and Cooling)	Incentive Amount	Requirements
Heat Pump Controls	\$250	Must be added to a heat pump with electric furnace auxiliary heat. Heat pump must be home's primary heat source. Visit www.energytrust.org/heatpumpcontrols for eligible models and more information. Thermostat lockout settings must be set to 35°F lockout. Cannot be combined with other heat pump, heat pump controls or smart thermostat incentives. Only available to residences serviced by PGE and Pacific Power.
Gas Fireplace	\$250 (FE 75% or greater)	Visit www.energytrust.org/fireplace for a list of eligible models. Unit must be equipped with electronic pilot light ignition and be vented to outside with sealed combustion. A CO monitor is required on every floor with a bedroom. Only available to residences serviced by NW Natural, Cascade Natural Gas, or Avista.
	\$150 (FE 70% - 74.99%)	
Gas Furnace Installed in a Rental Property ¹	\$1,600	95% or greater AFUE. Must be home's primary heat source. Not eligible for gas furnaces used as backup for high-efficiency heat pumps, also known as hybrid systems. A CO monitor is required on every floor with a bedroom. Cannot be combined with other gas furnace incentives. Only available to residences serviced by NW Natural, Cascade Natural Gas, or Avista.
Gas Furnace (Savings Within Reach) ¹		
Smart Thermostat	\$250	Residence must be primarily heated by an electric forced-air furnace, gas forced-air furnace, or ducted heat pump. Thermostat must be installed by an actively licensed contractor. Visit www.energytrust.org/thermostat for eligible models. Cannot be combined with other Energy Trust controls incentives or smart thermostat offers. Qualifying smart thermostats installed by a non-licensed contractor are eligible for an \$100 incentive. Only available to residences heated by PGE, Pacific Power, NW Natural, Cascade Natural Gas, or Avista.

¹ Trade allies must be enrolled in Energy Trust Instant Incentives to offer increased incentives rental properties and enrolled in Energy Trust Savings Within Reach to offer Savings Within Reach incentives. Incentives paid to trade ally.

EnergyTrust
of Oregon

<p>Incentives are available for detached single-family or manufactured homes in Oregon serviced by participating Energy Trust utilities (Portland General Electric (PGE), Pacific Power, NW Natural, Cascade Natural Gas, or Avista) unless noted otherwise. All work must comply with the Residential Specifications Manual and all other Energy Trust requirements. For small multifamily properties, please reference the Multifamily Incentive Information Sheet</p>		
Energy Improvement (Water Heating)	Incentive Amount	Requirements
Gas Tankless Water Heater	\$400	Unit must be ENERGY STAR® qualified at time of purchase. Please visit energytrust.org/tanklesswaterheaters for a list of eligible models. Unit must replace an existing gas storage tank water heater. Unit must be installed in a home with an existing ½" or ¾" gas line capable of serving the existing gas appliances in addition to the tankless water heater. Installs that include a line upgrade between the meter and the unit are acceptable. Installs with a gas line upgrade between the street and the meter will not qualify unless the upgrade was paid for by the utility.

Energy Improvement (Retail and Solar)	Incentive Amount	Requirements
Clothes Washer and Clothes Dryers	Varies	Select ENERGY STAR® certified clothes washers and clothes dryers are eligible for an Energy Trust point-of-purchase incentive at retail stores. Visit www.energytrust.org/retailers for participating retailers.
Solar Electric System	Varies	Based on rated capacity of solar panels in watts and utility. Visit www.energytrust.org/solar for details.
Gas Tank Water Heater Discounts	\$100	Energy Trust works with retailers and distributors to offer discounts on energy-efficient water heaters. Visit www.energytrust.org/water for details and participating retailers.
Heat Pump Water Heater Discounts	Up to \$700	
Reduced-Priced Grow Lights	Up to \$150 per fixture	Receive an instant discount on certified grow lights. Visit energytrust.org/incentives/indoor-grow-lights/ for a list of participating retailers.
Air Purifiers	\$75	Receive an instant discount on certified air purifiers. Visit energytrust.org/residential/incentives/air-purifiers for a list of participating retailers.

Important Residential Terms and Conditions:

- Application and supporting documentation must be submitted within 60 days from initial installation. Application must be complete and accurate for incentives to be paid.
- Unless a Savings Within Reach or instant incentive project, all itemized contractor invoices must be marked "paid in full" and be submitted with the incentive application.
- A non-trade ally contractor can install certain upgrades but must have a current Oregon Construction Contractors Board (CCB) license for projects in Oregon or an active Washington Contractor's license for projects in Washington. Non-trade allies or their customers cannot claim increased incentives for upgrades installed at rental properties or for Savings Within Reach projects.
- All incentives are subject to funding availability and may change.

¹ Trade allies must be enrolled in Energy Trust Instant Incentives to offer increased incentives rental properties and enrolled in Energy Trust Savings Within Reach to offer Savings Within Reach incentives. Incentives paid to trade ally.
